

JAN 16 2007

Serial No. 09/872,353

PATENT
New Atty Docket No.: 67134-5038**Amendments to the Claims**

This Listing of Claims replaces all prior versions, and listings, of claims in this application.

1-313 (Cancelled).

314. (Previously Presented) A sheet of printable business cards, comprising:
- a cardstock sheet construction having a front side and a back side;
 - a continuous liner sheet releasably secured with ultraremovable adhesive to and covering the back side of the cardstock sheet construction;
 - continuous through-cut lines through the cardstock sheet construction to the back side but not through-cut through the liner sheet;
 - the through-cut lines defining at least in part perimeter edges of printable business cards and of a matrix waste portion surrounding the printable business cards;
 - portions of the back side of the cardstock sheet construction forming back side surfaces of the printable business cards;
 - the printable business cards, the matrix waste portion, the liner sheet, the ultraremovable adhesive and the through-cut lines defining at least in substantial part a printable business card sheet construction;
 - the printable business card sheet construction having dimensions such that the printable business card sheet construction can be sheet-fed through a printer or copier for a printing operation on the printable business cards to form printed business cards;
 - areas of the sheet covering back sides of all of the through-cut lines, and being structurally capable of holding the printable business cards and the matrix waste portion together when the printable business card sheet construction is sheet-fed through the printer or copier for the printing operation;
 - the ultraremovable adhesive allowing the printed business cards to be removed from the liner sheet and from the matrix waste portion and into individual printed business cards with the ultraremovable adhesive remaining on the liner sheet and not on back side surfaces of the printed business cards and thereby the back side surfaces being non-tacky and the exposed portion of the liner sheet being tacky; and

Serial No. 09/872,353

PATENT

New Atty Docket No.: 67134-5038

the liner sheet being a solid continuous liner sheet.

315. (Previously Presented) The sheet of claim 314 wherein the dimensions are 8½ x 11 inches, 8½ x 14 inches or A4.

316. (Previously Presented) The sheet of claim 314 wherein the ultraremovable adhesive is a suspension-polymer ultraremovable adhesive.

317. (Previously Presented) The sheet of claim 314 further comprising a primer coat between the ultraremovable adhesive and the liner sheet.

318. (Previously Presented) The sheet of claim 317 wherein the primer coat is a polyvinyl alcohol-based primer with silicate.

319. (Previously Presented) The sheet of claim 314 wherein the printable business card sheet construction has no rupturable color capsules.

320. (Previously Presented) The sheet of claim 314 wherein the liner sheet is a primer-coated liner sheet.

321. (Previously Presented) The sheet of claim 314 wherein at least some of the printable business cards on the sheet are in a column with adjacent printable business cards in the column abutting one another and separated only by one of the through-cut lines.

322. (Previously Presented) The sheet of claim 321 wherein the column defines a first column, and wherein some of the printable business cards on the sheet are in a second column with adjacent printable business cards in the second column abutting one another and separated only by one of the through-cut lines.

323. (Previously Presented) The sheet of claim 322 wherein the first and second columns side-by-side abut one another.

324. (Previously Presented) The sheet of claim 314 wherein the through-cut lines include a grid of vertical and horizontal through-cut lines.

Serial No. 09/872,353

PATENT

New Atty Docket No.: 67134-5038

325. (Previously Presented) The sheet of claim 314 wherein the ultraremovable adhesive is a water-based acrylic suspension polymer adhesive.
326. (Previously Presented) The sheet of claim 314 wherein the sheet has a body portion and a thin end which is thinner than the body portion.
327. (Previously Presented) The sheet of claim 326 wherein the thin end is a calendered end.
328. (Previously Presented) The sheet of claim 326 wherein the thin end is an exposed strip of the liner sheet.
329. (Previously Presented) The sheet of claim 314 wherein the printing operation is a custom-indicia printing operation.
330. (Previously Presented) The sheet of claim 314 wherein the printer is a non-impact printer, and the printing operation is a non-impact printing operation.
331. (Previously Presented) The sheet of claim 314 wherein the printable business card sheet construction has no pin-feed strips.
332. (Previously Presented) The sheet of claim 314 wherein the ultraremovable adhesive provides only partial contact with the cardstock sheet construction and the partial contact prevents the ultraremovable adhesive from becoming permanent over time.
333. (Previously Presented) The sheet of claim 314 wherein one of the through-cut lines extends an entire width or length of the cardstock sheet construction.
334. (Previously Presented) The sheet of claim 314 wherein the printable business cards are arranged in a two column matrix on the liner sheet.
335. (Previously Presented) The sheet of claim 314 wherein the through-cut lines include horizontal and vertical through-cut lines, and a topmost one of the horizontal through-cut lines extends an entire width of the cardstock sheet construction.

New Atty Docket No.: 67134-5038

336. (Previously Presented) The sheet of claim 314 wherein the ultraremovable adhesive covers the entirety of the back side of the cardstock sheet construction.

337. (Previously Presented) The sheet of claim 314 wherein the liner sheet comprises a base paper sheet.

338. (Previously Presented) The sheet of claim 314 wherein the cardstock sheet construction comprises a top-coated cardstock sheet.

339. (Previously Presented) A sheet of printable business cards, comprising:

- a cardstock sheet construction having a front side and a back side;
- a continuous liner sheet releasably secured with ultraremovable adhesive to and covering the back side of the cardstock sheet construction;
- continuous through-cut lines through the cardstock sheet construction to the back side but not through-cut through the liner sheet;
- the through-cut lines defining at least in part perimeter edges of printable business cards and of a matrix waste portion surrounding the printable business cards;
- portions of the back side of the cardstock sheet construction forming back side surfaces of the printable business cards;
- the printable business cards, the matrix waste portion, the liner sheet, the ultraremovable adhesive and the through-cut lines defining at least in substantial part a printable business card sheet construction;
- the printable business card sheet construction having dimensions such that the printable business card sheet construction can be sheet-fed through a printer or copier for a printing operation on the printable business cards to form printed business cards;
- areas of the sheet covering back sides of all of the through-cut lines, and being structurally capable of holding the printable business cards and the matrix waste portion together when the printable business card sheet construction is sheet-fed through the printer or copier for the printing operation;
- the ultraremovable adhesive allowing the printed business cards to be removed from the liner sheet and from the matrix waste portion and into individual printed business cards with the ultraremovable adhesive remaining on the liner sheet and not

on back side surfaces of the printed business cards and thereby the back side surfaces being non-tacky and the exposed portion of the liner sheet being tacky; and

the ultraremovable adhesive being a suspension-polymer ultraremovable adhesive.

340. (Previously Presented) The sheet of claim 339 wherein the dimensions are 8½ x 11 inches, 8½ x 14 inches or A4.

341. (Previously Presented) The sheet of claim 339 further comprising a primer coat between the ultraremovable adhesive and the liner sheet.

342. (Previously Presented) The sheet of claim 341 wherein the primer coat is a polyvinyl alcohol-based primer with silicate.

343. (Previously Presented) The sheet of claim 339 wherein the printable business card sheet construction has no rupturable color capsules.

344. (Previously Presented) The sheet of claim 339 wherein the liner sheet is a primer-coated liner sheet.

345. (Previously Presented) The sheet of claim 339 wherein at least some of the printable business cards on the sheet are in a column with adjacent printable business cards in the column abutting one another and separated only by one of the through-cut lines.

346. (Previously Presented) The sheet of claim 345 wherein the column defines a first column, and wherein some of the printable business cards on the sheet are in a second column with adjacent printable business cards in the second column abutting one another and separated only by one of the through-cut lines.

347. (Previously Presented) The sheet of claim 346 wherein the first and second columns side-by-side abut one another.
